

THE IDEAL TOOL FOR PERFECT PREPARATION OF FLAT IRON PANELS

THE SNAPTABLE FOR STANDING SEAM METAL ROOFING

The SnapTable is an all-in-one panel preparation system for preparing to install standing seam metal roofing. This tool is designed to perfect and speed-up your panel preparation process while producing factory like cuts. This complete system is made up of 3 key components: the standing seam notcher, the panel cutter, and the eave and valley hemmer. The SnapTable Pro Hyper-lite provides the highest quality notching, cutting and hemming for any commercial, industrial or residential job. It is equipped to notch, cut & hem your snap lock and standing seam profiles at your eaves, hips and valleys.
